

Procedure di accoglienza e consegna dei bambini

Procedures for welcoming and delivering children

Children are accompanied by only one parent at the time, or another person with a written delegation. It is preferable that it is always the same adult both incoming and outgoing. Admission is cleared according to a fixed schedule for each group.

It is preferable that the accompanying person is no more than 60 years old.

The companion is not expected to be a minor even if he/she is a brother or sister.

You enter the School or Nursery school through the special marked gate/door.

You leave the School or the Nursery school through the special marked gate/door.

The safety distances are always maintained as shown by signs positioned on the ground.

The reception and the exit of the children are organized in the external space (gazebo...).

The reception/exit is organized in the first internal area near the entrance/exit door, this space is sanitized after each turn of entry and exit.

The Hydroalcoholic solution is available at the entrance and exit with indications for use and hand sanitization.

Each child and parent/care provider will have their temperature revelation taken upon arrival.

In the event that upon arrival the child or the carer has a temperature of $\geq 37,5^{\circ}$ or any other "Suspected Covid" symptom, they will not be able to access the service and the parent must contact the pediatrician or general practitioner.

Children are accompanied according to the agreed time (and communicated thru email) according to the preferential time slot. We welcome one child at the time and in case of contemporaneity one must wait for their turn.

It is not allowed to bring personal items or toys into the school.

Upon arrival, after measuring the temperature the child, helped by the educator, changes his shoes and sanitizes his hands, then enters the classroom.

Hand washing takes place several times a day, with the usual rituals in a systematic way and at each change of activity: before and after using the bathroom, before and after the meal, before being brought to the exit.

THE PARENTS

Parents or carers are not allowed to enter the facility except for the reception area in the morning or when the child is picked up at the exit.

Parents are not allowed to stay in the outdoor areas, including the parking in front of the church, to chat with other parents.

Parents must always have their mask correctly positioned.

At the entrance, both at the time of reception and at the exit moment, before coming in contact with various objects or school furniture, you must wash your hands with a hydroalcoholic solution.

The body temperature of the attendant upon entry is measured daily, together with the measurement of the minor. In case of temperature $\geq 37,5^{\circ}$ the minor and the parent are immediately removed from the structure and invited to contact their doctor.

The parents sign the co-responsibility pact with the school.
